

HUNTER SERIES "LIL ROW PLANTER"

by PLOTMASTER™

H-RP-101-09

The new "Lil Row Planter" attachment for the Hunter Series is perfect for small farming and gardening applications. Plotmaster's New Row Planter Attachment is a ground-driven seed metering system (with custom seed plates) designed to maintain accurate seeding rates for all types of row crops including a wide variety of garden seeds. Pneumatic packer wheel ensures good seed/soil contact for optimal germination. Row Planter Attachment includes planter module with seed tank, precision seed metering system with seed plates (2), seed openers, pneumatic packer wheel, and 2" receiver attachment.

These Lil Row Planters can be attached to our 2" receiver or for multiple row planter units it can be attached to our Hunter Series Plow attachments. These Lil Row Planters can also be attached to the Chisel Plow on our Grain Drill Attachment. The Grain Drill Attachment can also be used to dispense fertilizer while you plant with a series of these Row Planters. Therefore, with these new row planters, you can cultivate, fertilize, and plant your row crops in a single pass thus saving lots of time, money and effort.

SUGGESTED RETAIL: \$699.00
